INFANT & TODDLER EVALUATION (6 MONTHS – 5 YEARS)

This Evaluation is a wonderful way to understand and improve your child's vision. Most eye problems have few symptoms but have a lifelong impact on vision, learning and self-esteem. Helping your child at the earliest age possible is critical for best results. We are honored to take care of your family's vision.

PLEASE BRING ALL PREVIOUS RECORDS, GLASSES AND PRESCRIPTIONS TO YOUR VISIT.

ALL CHILDREN SHOULD HAVE AN EYE HEALTH AND DEVELOPMENTAL VISION EXAM.

EYE HEALTH EXAM:

DATE SCHEDULED: _____

- When we first meet you and your child, we will spend time "playing games" to collect data regarding your child's eye health and function. We use a camera to detect eye disease and as a baseline of your child's eye health.

DEVELOPMENTAL VISION DISCOVERY:

- Our doctors specialize in more than "20/20" vision. We also test for visual skill development that your child needs for strong reading and learning vision. The doctor will evaluate your child's ability to focus and move his/her eyes for learning to read, and screen for lazy eye and eye turns. These tests are predictive of your child's potential to maintain strong vision over time
- These tests are generally not covered under insurance.

TOTAL PROFESSIONAL FEE IS \$183.

IF FURTHER TESTING IS REQUIRED, DR. SCHOTTMAN WILL SEE YOUR CHILD AT A SEPARATE DAY'S VISIT.

STRABISMUS/AMBLYOPIA EVALUATION:

DATE SCHEDULED: _____

- If Strabismus and/or Amblyopia are detected during the Eye Health Exam, there are numerous muscular and neurological tests to be performed. Our methods are non-invasive and entertaining for your child.
- Eye Tracking, Focusing, Eye Teaming Ability and Depth Perception are evaluated to determine whether vision is supporting or interfering with performance to full potential. This will be important for success in school, coordination in sports and social interactions.

DR. SCHOTTMAN'S PROFESSIONAL FEE IS \$275.

VISUAL PERCEPTION/COGNITION TESTING:

DATE SCHEDULED: _____

- If a developmental delay or diagnosis is suspected, we will conduct standardized tests of Visual Perceptual and Cognitive Function. These concepts are the foundation for brain hemisphere integration, body coordination and language/reading readiness. We are measuring how your child receives, processes and understands visual information.
- This visit, which is usually conducted on a separate day, is 45 minutes to 1 hour

IF VISUAL PERCEPTION/COGNITION TESTING IS NECESSARY, THERE IS AN ADDITIONAL \$200 FEE.

CONFERENCE/REPORT:

DATE SCHEDULED: _____

- Conference to discuss all test results, diagnoses, prognosis and a treatment plan that is effective and achievable.
- We require that all Parents/Guardians be present at the Conference but no children.
- Total balance is due at completion of testing before Conference will be scheduled or Report created.

Please note the following:

- Ongoing Progress Evaluations may be required for your child. These are charged separately.
- Cancellations within 24 hours will be charged a \$45 rescheduling fee. No shows will not be rescheduled.
